CHABAD-LUBAVITCH OF PERU

Of Peru's 28 million inhabitants, some 3,000 are Jewish, with 80% of them Holocaust survivors who emigrated to Peru and their descendants. Chabad-Lubavitch opened its center here in Lima, in 1988, with the objective of developing humanitarian, educational and cultural activities to benefit this survivor community. Below is a partial detailing of the activities emanating from the Chabad-Lubavitch center in Lima, which reaches out to the country's entire Jewish population, spanning large geographic distances.

Projected Plans

Our present facility is 1600 sq. meters. To accommodate our growth, we need to build a new facility which will include a 500-capacity hall, a student dormitory, a professional kosher industrial kitchen, a Jewish library, offices, a mikveh, classrooms computer rooms, and video room.

We estimate the funds needed to launch this project at about \$2,000,000.00

An annual stipend of a \$100,000 annually towards the humanitarian activities for this survivor community, would enable us to facilitate aid to these people in increasing measure.

We thank you for your consideration.
